

9
SOFFORD, 1639.

A new Almanacke and
Prognostication , for the
yeere of our Lord God,
1639.

Being the third from the
Bissextile, or Leap-yeare.

Calculated especially for the La-
titude and Meridian of the most ho-
nourable City of *London*: But may
very well serve for most parts of great
Britaine.

By *Arthur Sofford* Philomathist.

*Os homini sublime dedit, Cœlumque
videre Jussit, et erectos ad sidera tol-
lere vultus.*

LONDON,
Printed by R. O. for the Company
of STATIONERS.

Vulgar Notes and moveable Feasts, &c. 1639.

Julian or English account. Lilian, Gregorian or Roman account.

1636	A very great Snow.	3
1638	Another very deepe Snow.	1

A Prognostication.

*Astronomick Calculations for this present
Yeare. 1639.*

The true Precession of the Equinoctiall, or the distance of the first Starre of Aries from the Equinoctiall point, according to the Prutenick Tables, is 28 deg. 27 min. 33 sec. 6 thirds. But according to Tycho Brahe and Kepler, it is 28 deg. 9 min. and 18 seconds.

The Obliquitie of the Zodiack according to the Prutenicke account, is 23 deg. 28 min. 0 sec. 15 thirds. But according to Tycho Brahe, it is 23 deg 3 min. 30 seconds. And Kepler (accompting the Suns greatest Parallaxe lesse by 2 thirds then the Ancients and Tycho) would haue the Obliquity lesse by 1 minute, viz. 23 deg. 30 min. 30 sec. very neere the same which Regiomontanus vseth in his Tables of Direction

The Eccentricitie of the Sunne according to the Prutenicke Tables, is 32194 parts, the Semidiameter of the Eccentrick being 10000000. But according to Kepler in the Rudolphine Tables, such an Eccentricitie should be 3600 parts, the Semidiameter being 100000.

*The Retrogradations of the Planets this yeare,
1639.*

♄. Saturne is Retrograde from the 20 day of May, until the 6 day of October.

♃, Iupit

Sofford. 1639.

4. Jupiter is Retrograde from the 14 Day of March, until the 13 Day of July.

5. Mars is not Retrograde all this yeare.

6. Venus is Retrograde from the 6 Day of November, until the 15 Day of December.

7. Mercurie is Retrograde from the 27 Day of January, until the 19 Day of February.

8. He is Retrograde from the 24 Day of May, until the 6 Day of Iune.

9. He is Retrograde from the 17 Day of September, until the 9 Day of October.

Of the foure Quarters of the Yeare, and first of Winter.

The Winter quarter of this yeare, began according to the Prutinicke Tables upon the 12 Day of December, 1638. at 8 of the clocke and 34 minutes in the morning: but according to the exact accompt of the Rudolphine Tables, upon the 11 Day of December at 4 a clocke and a quarter in the afternoone. At which time, the Sunne entred into the Tropicall signe of Capricorne, making the shortest day and longest night to all that dwell on the North-side of the Equinoctiall line. The length of the day being then with vs at London, 7 houres 34 min. and 12 seconds: and the length of the night, 16 houres 25 minutes, and 48 seconds.

The nature of this Quarter is cold and moist, and therefore fitly resembled to the first declining Age, or Flegme, to Water, and to the West winde.

Of the Spring.

The Spring taketh the beginning when the Sun entred into the first scruple of the Equinoctiall signe Aries, making equall Day and Night throughout the whole world: which cometh to passe this yeare, according to the Prutinicke upon the 11 Day of March, 25 minutes before high noone: but according to the Rudolphine accompt, upon the 10 Day of March,

Sofford, 1639.

March at 4. of the clocke and 21 minutes in the afternoone.

The nature of this Quarter, is hot and moist. and therefore resembled well, to Youth, to Blood, to the Spret, and the Southwinde.

Of the Summer.

The Summer being the third quarter Astronomically, be-
ginneeth when the Sunne entrencheth into the first scruple of
the Tropicall signe Cancer: which happeneth this yeare (ac-
cording to the Prutenicke account) upon the 12 day of June
at 6. of the clocke and 49 minutes in the morning: but ac-
cording to the Rudolphine Tables, upon the 11 day of June at
of the clocke and 58 minutes in the afternoone. At what
time the Sunne maketh the longest day and shortest night
to all that are on this side of the Equinoctiall line; the Day
then containing with vs at London, 16 houres, 25 min. and
48 seconds: and the night 7 houres, 24 min. and 12 seconds.

The nature of this quarter is hote and dry; and therefore
is resembled, to Infancie, to Choler, to the Fire, and to the
East Winde.

Of the Autumne.

Autumne or the Harvest-quarter, begins alwayes when the
Sunne entrencheth into the Equinoctiall signe Libra, thereby
making the dayes once againe equal to the nights in all the
world. which will be this yeare (according to the Prutenicke
Tables) upon the 13 day of September, at 6 of the clocke, and
48 min. in the afternoone: but according to the Rudolphine
Tables, upon the same day, at 11 a clocke and 4 minutes in
the forenoone.

The nature of this quarter, is cold and dry; and therefore
not busily resembled to Old age, to Melancholy, to the
Earth, and to the North Wind.

*Verq; novum stabat cinctum florente corona,
stabat nuda Aestas & spicea ferta gerebat;
stabat & Autumnus calcatis sordidus urvis,
Et glacialis Hyems canos hirsuta capillos.* (Ovid.)
Eclipses

Sofford, 1639.

Eclipses.

There shall bee presented to the view of the Inhabitants of the Earth this yeare four Eclipses, two of the Sun, and two of the Moone; whereof one onely and that of the Moone, shall be visible in our Horizon.

The first Eclipse shall be of the Sunne upon the 22 day of May, being the Wednesday in Rogation weeke; which in generall for all parts of the Earth, where it shall be seen in whole or in part, is thus limited in respect of time, as we compute it at London, and that according to the Rodolphine Tables: viz.

The beginning of the Eclipse, at one a clocke and 33 min. the after-noon.

The beginning of totall darknesse at 2 a clocke and 54 min.

The middle of the Eclipse, at 3 a clocke and 59 minutes.

The end of totall darknesse, at five a clocke and 4 min.

And the end of every part of the Eclipse in any part of the Earth, at 6 a clocke and 26 minutes.

Particularly, with us inhabiting at London and thereabouts, the beginning of this Eclipse of the Sunne shall be at 1 of the clocke, and 12 minutes, in the afternooke; the middle, 5 of the clocke and a quarter, and the end at 6 of the clocke and 18 minutes. The points Eclipsed or darkened in the middle thereof shall be 8, and 43 minutes.

2 The second Eclipse shall be of the Moone, upon the 5. day of June, being the Wednesday in Whitson weeke.

The beginning thereof, shall be 27 minutes after high noon.

The beginning of totall darknesse, at 1 a clocke and 14 min.

The middle at one of the clocke and 33 minutes.

The end of totall darknesse, at one a clocke and 52 minutes.

The end of the Eclipse at 2 of the clocke and 38 minutes.

The Digits or Points darkened shall be 12 and 37 minutes.

This Eclipse shall be scene of our Antipodes, and generally where soever the Moone shall then be scene, being night to us, though about midday to us.

3. The third Eclipse shall be of the Sunne upon the nineteenth day of November, being Thursday; which for the generall

A Prognostication.

generall will be thus limited, in respect of the time with
v.z.

The beginning will be at 8 of the clocke and 23 minutes
in the morning.

The beginning of totall darknesse, at 9 a clocke and 34 minutes.

The middle, at 10 a clocke and 55 minutes.

The end of totall darknesse, a quarter after 12.

The end of the Eclipse, at one a clocke and 27 minutes
in Noone.

This Eclipse will be seene in the parts of the Earth
lying Southwards from vs, beyond the Equinoctiall Line.

4 The fourth Eclipse will be of the Moone, happening
upon the last day of November being S. Andrew day.

The beginning thereof, will be at nine of the clocke and
minutes in the morning.

The middle, at 10 a clocke and 24 minutes.

The end, at eleven a clocke and 35 minutes.

The Digres of Points Eclipsed, will be 4 and 13 minutes.

It will be seene in the parts of the world which lye
from vs, where they haue night with them at that time.

Briefe Rules of Husbandrie.

Sow seedes, plant, grasse, the Moone in Taurus, Virgo
Capricorne, or Aquarius, the Winde not Easterly.

Sheare sheepe in the increase of the Moone.

Fell Timber for building towards and in the last quarter.

Seld of libbe Castell, the Moone in Aries, Sagitarus or
Capricorne.

Kill for Swine for Bacon about full Moone.

Cut Vines in Februarie or March.

Remoue Trees the last quarter of the Moone, between
Hallowmas and Twelue day.
